

THE GEAR WE USED

Probably the coolest detail of our “gear trivia” is that we shot 80+% of our film using a DJI Osmo Pocket 3 camera. This camera is INCREDIBLE. It has a 1” sensor, shoots in LOG, has great lowlight capabilities, and the stabilization and portable convenience made it an awesome run and gun documentary camera. Although much of the interview audio was shot using the camera’s built-in mic, we also paired a DJI Mic 2 Duo. The DJI mic receiver attaches directly to the camera via USB-C.

For the cinematic testimonial interviews with Jade, Cora, Madison and Tava, we used a Canon R5. The drone shots were filmed with a DJI Mini 2 drone.
